[*Price* 1*s. single, and* 9*s. the dozen*]

An ADDRESS to the PEOPLE,

On the subject of MONOPOLY and EXTORTION.

DEAR BRETHREN,

FROM an ardent glow of generous patriotism, and a sincere attachment to the cause of freedom, I am induced to seek the prosperity of my country with the tenderest concern and deepest solicitude. The indulgent public will therefore pardon the presumption and vanity I may be guilty of in this undertaking, as it is nothing more than a well meant essay, to do good, tho' with a melancholly apprehension that not a word of all that I shall say will be regarded. When tyranny and usurpation, by terrible strides across the *atlantic* reached our peaceful shores, and made the first attack upon our liberties, it is surprising with what boldness you asserted your rights as freemen; with what unanimity and zeal you opposed the first encroachments of lawless power; and with what religious exactness you adhered to the agreements and regulations that were then concerted as the best medium of resistance, in which you evidently sacrificed private interest to that of the public, and thereby exhibited a spirit of patriotism worthy of yourselves. How justly as well as severely did you also stigmatize those daring villains, who divested of every sentiment of honour and virtuous patriotism, violated those sacred engagements by sordidly preferring their private interests to the salvation of their country, the welfare of posterity, and the common good. But tho' the schemes that were then projected did not so fully answer our expectation as could have been wished, yet it served to discover the real sentiments of the people, who manifestly approved of these disinterested resolutions, a few individuals only excepted; and the universal cry was, "*death is preferable to slavery*:" Almost the whole Continent with one heart and one voice, being engaged in the glorious cause; and private interest when set in competition with the public good, was ranked with black ingratitude and perfidy.—Thus you did go on with undaunted courage and invincible resolution, persevering in the best of causes, notwithstanding the snares and machinations of the adversary on every side.—But the scene at length has shifted:—Public virtue has declined, and given way to private interest. Monopoly and extortion, with a rapidity equal to that of *Noah*'s flood, has overwhelmed the land to almost an equal height; and the cloud still gathers blackness in our hemisphere, and darkens the prospect as far as eye can reach; and which unless dispelled, will burst, I fear, in still greater abundance, to the no small detriment of that great cause, on the issue of which, such grand events are to be expected. For tho' we continue happily united in one of the main points, I mean that of opposing the public enemy; and our arms have been of late crowned with happy success; yet this will not, I fear, altogether avail us, except a stop can be put to the present growth of monopoly and extortion, as these have a plain tendency to divide, to disunite, and create differsions among ourselves; an event which our enemies have long desired and waited for, tho' happy for us, it has

not yet taken place. To see a band of people distressing and devouring one another, while a public enemy in the bowels of their country, are spreading devastation and ruin on every side, would be, to an indifferent spectator, equally surprising and ridiculous; tho' not more so than, in circumstances like ours: To see men who but a little while ago seemed ready to sacrifice their all to the shrine of liberty, and to out-vie each other in their exertions for the common good, now to out-vie each other in their disregard of public virtue; and to emulate each other in the vile practice of extortion by extravagant demands for what they have to sell; or in refusing it to the necessitous at any price for the ready cash; and to see them pursue these destructive courses to such uncommon lengths, when the worst of mischiefs both to themselves and the community, are likely to be the consequence. If men would but for one moment reflect on the dangerous tendency of these pernicious practices, there are none, I believe, who have the least sincere regard for the good of the common wealth, but what would readily unite in suppressing them.—But men are sunk so deep into self, and there is so little public virtue remaining, that we seem, in some measure, to have lost sight of the main point, and every faculty is exerted in the cause of private interest and self-aggrandizement. But I shall not attempt to describe all the infelicities and mischiefs which are consequent upon this business of monopoly and extortion. Let it suffice only to remark, that as it strikes at the vitals of the common wealth, by affecting the medium of trade, by distressing the poor, and discouraging the inlistment of soldiers; as well as by various other ways and means which are equally pernicious and destructive; it is certainly incompatible at once with private interest and public liberty; as these are so closely connected in the present unsettled state of things, that they must stand or fall together. Those of you who are possessed of independent fortunes, should the war prove successful, will be the greatest gainers. Should it prove unsuccessful, you will be the greatest loosers. The fate of your fortunes depends on the success of your arms. It is the rich that are principally affected by this dispute. The poor have little to loose; but you depend on these to defend your country and fight your battles. They have ventur'd their lives and shed their dearest blood for you. And yet it is the poor chiefly that feel the calamitous effects of monopoly and extortion; tho' it is evident these men were never more necessary than now, never more useful, and their services were never yet of greater importance. Surely such men are worthy of some notice. They claim some attention. They deserve all possible encouragement. And nothing can be so conducive to this, as putting a total period to the present extravagances, and parting with the necessaries of life for the current cash, at the stipulated price. We should then go hand in hand without murmuring and discontent. Our ears would not then be filled with the complaints and grievances of the oppressed poor. Our armies would be filled with soldiers who would be excited to act like men that had a valuable recompence for their services; and have something of consequence to stimulate their native valor. Our Generals would not then be so often reduced to

the neceſſity of calling in the militia to their aſſiſtance?—And a happy period, perhaps might ſoon take place to the preſent war. Theſe and many other advantages are the natural offspring of a reformation from the above mentioned abuſes. A reformation in which no truly public ſpirited man and friend to his country, will be wanting in his exertions to effect.

But I muſt draw to a cloſe, after congratulating you upon the late happy ſucceſs of your arms; a ſucceſs which together with a removal of the above-named oppreſſive grievances, it is hoped will be attended by the moſt deciſive good conſequences; and be a means of ſpeedily eſtabliſhing theſe United States, in circumſtances of peace, liberty and ſafety. That this glorious period may be haſtened on, is the hearty deſire and ſincere wiſh of, dear brethren, your moſt reſpectful and moſt humble ſervant,

October 24, 1777. THE AUTHOR.

Of the ECLIPSES this Year, 1778.

THERE will be three Eclipſes this year; Two of the Sun and one of the Moon, in the following order, *viz.*

I. The firſt will be of the Sun on *Wedneſday* the 24th day of *June*; the moſt remarkable Eclipſe ſeen with us for many years. It will be viſible and total, and by calculation as follows, *viz.*

	h.	*m.*	*s.*	
Beginning ——	9	23	49	Equal (time Fore-noon.
Beginning of total darkneſs	10	38	27	
Middle, or greateſt obſcurat.	10	40	47	
End, or emerſion fr. tot. dark.	10	38	14	
End & full recovery of light	12	8	41	
Duration of total darkneſs	0	4	53	
Whole duration of the eclipſe	2	44	52	
Quantity eclipſed,—digits,	12	14	53	

The parallax of latitude at the time of the viſible conjunction by an exact calculation I found to be 19 *minutes* 19 *ſeconds ſouth*; and the Moon's true latitude *north aſcending* 18 *minutes* 54 *ſeconds*, ſo that the viſible latitude is only 25 *ſeconds ſouth*: the ſemidiamiter of the Moon, in the circle of altitude, being near her *perigé*, is 16 *minutes* 50 *ſeconds*, and that of the Sun 15 *minutes* 49 *ſeconds*. The black circle round the margin of the type, repreſents the exceſs of the Moon's diamiter above the diamiter of the Sun. This eclipſe will be celebrated in about 3 degrees of the celeſtial *Crab*.

II. The ſecond is of the Moon on *Thurſday December* the 3d day, viſible, and by calculation as follows, *viz.*

	h.	*m.*	*s.*	
Beginning ——	11	13	39	Equal time. Afternoon.
Middle ——	12	24	49	
End ——	13	35	59	
Duration ——	2	22	20	

Quantity, eclipſed,——digits, 5 ½ on the North ſide.

It is celebrated in about 12 deg. of the celeſtial *Twins*.

III. The third will be an Eclipſe of the Sun, on *Friday* the 18th day of *December*, about five in the afternoon, inviſible.

On the Croſs Events *of* Life.

WHY were there once tranſporting pleaſures known,
Or why, alaſs! are they forever flown!
Thus the vain impotence or reaſoning pride
Arraigns the preſent, blind to all beſide.
Yet Heav'n alwiſe, indulgently ſevere,
Which makes our trueſt happineſs its care. Theſe

Full Quart. 6 Day 4 Morn. | Laſt Quart. 20 day 9 Morn.
Full Moon 12 Day 9 aftern. | New Moon 28 day 10 Morn.

Wheel in unperturbed Ways:
Ends are tied to our first Days.
All *Mankind* are rul'd by *Fate*,
No Man can propose a *State*
Firm and stable; various *Chance*,
Always rolling, doth advance
That *something* which we fear.

On DELAY.

DELAY gives Strength: the tender bladed Grain,
Shot up to Stalk, can ſtand the Wind and Rain.
The Tree, whoſe Branches now are grown too big
For Hand to bend, was ſet a tender Twig:
When planted, to the ſlighteſt Touch would yield,
But now has got Poſſeſſion of the Field. Reſiſt

But is one Day of Eafe too much to borrow?
Yes ſure; for Yeſterday was once To morrow;
That Yeſterday is gone, and nothing gain'd,
And all thy fruitleſs Days will thus be drain'd;
For thou haſt more To-morrows ſtill to aſk,
And will be ever to begin thy Taſk:
Who, like the hindmoſt Chariot Wheels, are curſt,
Still to be near, but ne'er to reach the firſt.——

Ye Fair, whose Prudence, cautious of Deceit,
In Praise too warmly given, suspects a Cheat,
Without Disguise a Lover's Flattery hear,
Love, when it flatters most, is most sincere.
Sweet are those Pains which Lovers long endure;
He is half-cur'd who wishes for a Cure.

THOSE who are made of fearful diſpoſitions, of all others ſeem the leaſt beholden to nature. I know not any thing wherein they can be more unfortunate: They enjoy nothing without a frighted mind; their ſleeps are even troubleſome to them: They tremble at the preſent, and miſeries that but may come, they anticipate and ſend for, painting them in more dreadful colours than any enemy can deviſe: Nay, it were well if they did but *fear* more miſeries than the bolder people; but it plainly appears the Coward really meets more dangers than the valiant man; for every baſe nature will be ready to offer injuries, where they think they will not be repaid: He will many times beat a Coward, whom he would not dare to ſtrike if he thought him valiant: Evils which muſt be, they meet with before their time; and evils which are but probable, they aſcertain. They who by an even poiſe, might ſet ſafe in a boat on a rough ſea by riſing up to avoid drowning, are drowned. We know ſome out of fear of death, have died. In a battle we oftentimes ſee the valiant man eſcape, by a conſtant keeping his rank, when a coward, ſhifting dangers, runs, by avoiding one, into the ſeveral walks of many. Certainly (ſays *Feltham*) I have ſtudied in vain in thinking what a coward may be good for: If ever he did any thing well, Fortune was his guide, not Wiſdom. His fear begets in him delay, and delay breeds that which he fears, viz *Danger*. The Soldier that dares not fight, affords the enemy too much advantage for his preparation, both for directing his men plotting his ſtratagems, ſtrengthening his files, ordering his camp, or doing any thing that may turn to the diſadvantage of his foe. On the other hand, all the noble deeds that have beat their marches through ſucceeding ages, have proceeded from men of courage. And I believe many times their confidence kept them ſafe. A bold look will ſometimes daunt a baſe attempter. The brave ſoul knows no trembling. *Cæſar* ſpake like *Cæſar* when he bade the mariners fear nothing. Indeed valour caſts a kind of honour upon God, in that we ſhew that we believe his goodneſs, while we truſt ourſelves in danger upon his care only. The valorous warrior gives moſt diſcomfiture in his ſuddeneſt onſet. Indeed temperance, as the caſualties of the world are, is a virtue of ſingular worth; but without doubt high ſpirits directed right, will bear away the bays for more glorious actions. Theſe are beſt to raiſe commonwealths; the others beſt to govern them. Both are of excellent uſe. An arrow aimed right, is not the worſe for being drawn home. That action is beſt done, which, being good, is done with vigour of ſpirits. What makes zeal ſo commendable, but the fervency it carries with it?——

A Judgment of Don Pedro, King of Portugal, in a Case of Murder.

A Portuguese Shoemaker prosecuted a Roman Catholic Bishop who had got his father assassinated, and the fact being proved, the Bishop was prohibited from saying Mass for one year; the Shoemaker not satisfied, applied to Don Pedro King of Portugal, who, after enquiring into the case, sent for the Shoemaker, and ask'd him if he would venture to kill the Bishop; which he undertook to do with the King's permission, and performed the day following, at a procession, just under a window where his Majesty was placed: He was immediately seized and brought before the King. Don Pedro asked what could prompt him to murder a Bishop; he pleaded the provocation he had received, and his Majesty's permission: To which the King replied, since the Bishop was prohibited from saying Mass for one year, I condemn you not to work at your trade for the same term; but that you should not starve, a pension must be paid you out of the Bishop's estate.

JUSTICE indeed!—O great and glorious name!
Through every time and station thou'rt the same;
No pains nor death, should break thy sacred laws,
But better perish in the righteous cause. ——
Act as you will, to State and Laws, if true,
Right will prevail at last;——if false, adieu!

A THOUGHT.

HOW like the fleeting Wind away,
Whole Years of Joy depart;
But Oh! how slowly does one Day,
Move to the mournful Heart!

Epitaph on a MISER.

READER, beware of immoderate love of Pelf,
Here lies the worst of Thieves, who robb'd himself.

[illegible] Yearly Meetings in NEW-ENGLAND.

At *Sandwich*, the 6th day before the last first-day in the 3d month.
At *Greenwich*, the last first day of the 5th month.
At *Rhode Island*, the 2d sixth day of the 6th month.
At *Nantucket* the 4th sixth day of the 6th month.
At *Kingston*, the 2d first-day of the 8th month.
At *Providence*, the 4th first day of the 8th month.
At *Salem*, the 4th first day of the 9th month.
At *Scituate*, the 1st sixth day of the 10th month.
At *Dartmouth* the 4th sixth day of the 10th month.
At *Sandwich*, the 2d seventh-day of the 11th month.

The following is the Method of making Molaſſes and Sugar, from what is commonly called Sugar-Cane, *(as practiſed by the Planters in the* Weſt Indies) *and which may be done in the ſame way from the* Stalks *of our common* Indian Corn *(if cut before they are too dry) or from any other* Sweet Juice, *ſuch as* Maple, *&c. as was performed laſt Year, by many Perſons in this State, with great Succeſs.*——

THE Planters, at the proper ſeaſon, cut off the Reeds at one of the joints near the roots; they are then cleared of the leaves, and tied up in bundles, and ſent to the Mills, which are worked either by water or horſes. The ſugar mill is compoſed of three rollers of an equal ſize, placed perpendicular, and all armed with iron plates, where the canes are to paſs between them, only the middle roller is much higher than the reſt, to give the larger ſweep to the poles to which the horſes are yoked.*

The great roller in the middle is furniſhed with a cog full of teeth, which catch the notches in the two ſide rollers, and force them about to bruiſe the canes, which paſs quite round the great roller, and come out dry and ſqueezed from all their juice, which runs into a veſſel under the mill, and is thence conveyed into the firſt boiler. After the juice is let out of the firſt veſſel, it is received into another, in which it is boiled more briſkly, and ſcummed from time to time with a large kind of ſpoon, pierced with holes to let the liquor through, while it retains the ſcum and ſouldneſs ſeparated from it in boiling; towards the end of this boiling, they throw into it ſome ſtrong lye of wood-aſhes with ſome quick lime mixed among it; this greatly promotes the ſeperation of the ſouldneſs that yet remains among it, and, after it has boiled ſome time with this addition, they ſtrain it off. The dregs left in the cloths make a kind of wine, when fermented properly with water. The ſtrained liquor, which is now tolerably clean, is let into a third boiler, in which it is boiled down to the conſiſtence of Sugar over a briſk fire, the people who attend it continually ſkimming and ſcumming it. Great caution is to be uſed that the boiling matter does not run over the ſides of the veſſel, which would be of very dangerous conſequence; they prevent this by taking up quantities of the boiling matter with a ladle, lifting it up high, and letting it run in again, and by now and then adding a ſmall piece of butter or fat

* Thoſe who do not incline to be at the Expence of erecting a Preſs on purpoſe for this Uſe, the common Cyder Preſs will anſwer, but not to ſo great advantage.

fat of some kind, which takes down the bubbling almoſt inſtantaneouſly. They are very careful that no acid of any kind comes near the veſſels, a very ſmall admixture of that being ſufficient to keep the matter from granulating. When the liquor is boiled enough, which is known by its concreting, on throwing a ſpoonful of it up into the air; it is then let out into a fourth veſſel, under which there is a very gentle fire, only kept up that it may have leiſure to granulate; when it has begun to granulate, it is let out of this laſt boiler into a kind of conic earthen veſſels, open at both ends; the wideſt aperture is placed upwards, and the ſmalleſt end downwards, its aperture being ſtopped with a wooden plug. It is left in theſe veſſels twenty four hours to concrete; after this they are removed into ſugar houſes, with a veſſel of earthen ware under each; the plug is then taken out of the bottom aperture of each, and they are left in this condition for about forty days, that all the thick liquor or Molaſſes, may run from them; after they have ſtood thus long to drain of themſelves, a quantity of clay is diluted with water into a thin paſte, and this is poured on the top of every parcel of ſugar in the veſſels, ſo as to cover it two or three inches deep. This water, by degrees all leaves the clay, and penetrating into the maſs of ſugar, runs through it and carries off yet more of this foul thick liquid with it into the veſſels placed underneath to receive it. When the clay is quite dry, it is taken off, and the firſt preparation of the Sugar is then finiſhed; they then ſhake it out of the veſſels, and cut it into lumps which are of a dirty, browniſh, or greyiſh colour; it is then put up into hogſheads or other caſks, under the name of grey or brown Sugar. The ſugar in this ſtate, ought to be dry, not unctuous, and to have no taſte of burning. The liquor which has run from the ſugar in ſtanding is boiled, and ſold under the name of Molaſſes, which affords, by diſtilling, a very clean and good ſpirit, vulgarly called RUM.——

Many other Plants and Trees might be found which would yield ſugar; thus ſeveral ſpecies of Maple, &c. afford a juice which boils into good Sugar; but the great quantity of it yielded by the Sugar cane, and its eaſy culture, renders it unneceſſary for the Weſt Indians to look farther after what it ſo abundantly ſupplies them with; tho' in theſe northern Climes we are unavoidably neceſſitated to ſubſtitute other Things in its ſtead—ſuch as the Stalks ſweet Apples, &c. in order to produce therefrom the above uſeful articles of life, viz. *Sugar* and *Molaſſes*—which we in themſelves not only innocent, but reconcile to the palate and ſtomach ſubſtances otherwiſe diſguſtful to both.

An excellent Styptic to ſtop the Bleeding of freſh Wounds, very proper to be uſed in Amputations.

TWO Drahms of Caſtile Soap, ſcraped fine, and diſſolved in Brandy or common Spirits; one Drahm of Pot aſh added thereto; then well mixed and kept in a Phial, cloſe ſtopped, for uſe. Warm it, and apply lint Pledgets dipt therein to the wounded part, and the Blood will immediately coagulate and congeal a conſiderable way within the Veſſels as well as without.

A Taylor having mended a Pair of Breeches for one of his Cuſtomers, was carrying them Home, when he ſaw a Funeral paſs by, attended in the Proceſſion by an Apothecary whom he knew:—*So Maſter*, ſays he to the Apothecary, *I ſee you are going to carry your Work home too, as well as I.*

CASH given for old Linnen RAGS at the *Bible* and *Heart* in Cornhill, *Boſton*.
